EDUCATION

Georgia State University: J. Mack Robinson College of Business May 2026
Bachelor of Business Admin. in Computer Information Systems (Cybersecurity and Data Analytics) Atlanta, GA

RELEVANT COURSEWORK

BUSA 4500 – Panthers Accelerated Career Experience (PACE) with McDonalds Spring 2026
Project Coordinator and Technology Lead | QSRSoft, Tableau, PowerBI, OpenAI

- Selected for a competitive consulting practicum with Sunshine & Sunrise Enterprises (McDonald's franchisee) to address declining satisfaction amid strong sales
- Leveraged** QSRsoft for live operational diagnostics and combined AI-driven BI platforms (Power BI, ChatGPT) to uncover root causes of service breakdowns and model potential revenue uplift from retention strategies
- Facilitated** executive stakeholder workshops and delivered a prioritized implementation roadmap securing leadership buy-in for a retention-focused pilot

RELEVANT PROFESSIONAL EXPERIENCE

NCR Voyix May 2025 – August 2025
Product Management Intern | Jira, Figma, Confluence, Smartsheets Atlanta, GA

- Guided product integration analysis** between NCR Voyix and 3rd-party delivery platforms (DoorDash, Uber Eats, Grubhub), **conducting** market research to guide SSIO framework and 3PI onboarding
- Built and presented **comparative analysis matrix** of POS systems (Toast, PAR, Qu, Symphony) to inform executive product decisions on feature adoption and commercialization.
- Developed** architecture diagrams and user flows for DoorDash onboarding, leveraging Figma and Confluence to align product and UX teams

Southern Company Gas May 2024 – August 2024
Product Development and Data Analytics Intern | Python, SQL, PowerBI, Tableau Atlanta, GA

- Operated Python and SQL to **integrate** weather data into linear regression models, **improving** forecast accuracy
- Automated** validation logic for 100+ B2B clients, **reducing** data processing errors and ensuring model reliability
- Orchestrated the migration of 15+ dashboards into Power BI, partnering with stakeholders to align visuals with org-wide standards and improve decision-making adoption

LEADERSHIP EXPERIENCE AND PROFESSIONAL DEVELOPMENT

Panthers Immersion Program | Panthers In Charlotte Captain January 2024 – November 2024

- Selected from a competitive pool of 400 applicants via rigorous multi-stage application and selection process
- Leveraged the Georgia Fintech Academy, to present a data-driven proposal to Truist executives, communicating value proposition, risk management strategies, and implementation feasibility
- Directed a team in the Truist Case Challenge, securing 3rd place with an innovative co-living financial solution.

Keylogger | C++, Winsock2, CPR Library, Windows API June 2025 – Present

- Engineered an advanced keylogger in C++ deploying Winsock2 and the Windows API, capable of capturing over 200 hours of keystroke data, including complex input sequences, for usability testing and security analysis
- Implemented CPR Library and low-level system hooks to accurately log non-alphanumeric input (e.g., hotkeys, function keys, shortcuts), enhancing comprehensiveness of captured data
- Optimized keylogger for stealth operation, minimizing its system footprint and achieving a 95% antivirus evasion rate through efficient process injection and memory management
